

**Prosenjit Sarkar** currently serves as Chief Information Security Officer at BSP Financial Group Limited where he oversees Information Security programs across all jurisdictions. With over 25 years of experience, he has built and matured security programs that align with regulatory & compliance expectations, business goals and organizational priorities. His work spans geographically dispersed financial environments in the Pacific region, giving him a uniquely practical perspective on how technology transformation, including the rise of Artificial Intelligence intersects with risk, regulation, and operational resilience in the financial services industry.

Prior to BSP, Prosenjit held senior technology leadership roles at Telecom Fiji, GE Healthcare, and Infosys Technologies, bringing a rich global perspective to his work.
