

Ritesh Chugh is the Associate Dean (Engagement) and Professor of Information and Communication Technologies in the School of Engineering and Technology at Central Queensland University, Australia. His research focuses on educational systems, pedagogies, and technology-enhanced learning. Ritesh is listed among the Stanford/Elsevier World's Top 2% Scientists, recognising his impactful research. He is also known for

his commitment to improving student outcomes through innovative teaching practices, earning several prestigious awards, including the International Education Association of Australia's Best Practice in International Education Award and the Dean's Award for Mid-Career Research Excellence. He has been recognised for his contributions to learning and teaching with the Vice-Chancellor's Award for Good Practice and a Staff Award for International Education. He recently led the development of an AI pedagogy toolkit for ICT education, which received a national award. Additionally, he regularly shares his expertise in socio-technical topics through public scholarship in both national and international media. Ritesh is a Senior Fellow of the Higher Education Academy and is at the forefront of advocating for the transformative potential of generative artificial intelligence tools across educational, professional, and entrepreneurial landscapes.
