

## Sangeetha Kutty Bio

**Sangeetha Kutty** holds the position of Lecturer in Information and Communications Technology at Central Queensland University, Australia. A transdisciplinary academic with expertise in data science, she is dedicated to bridging industry, academia, and research to create data-driven solutions that have a meaningful impact on both regional and metropolitan Australian communities. Her research spans cutting-edge areas, including generative AI, machine learning, text and social media mining, deep learning, recommendation systems, and information retrieval. Passionate about innovation,

Sangeetha's work harnesses the power of data to address real-world challenges and deliver impactful solutions.

Sangeetha is also the co-founder and vice-president of CQUni's WinTech (Women in Technology) STEM+C Club, where she organises industry seminars, panel discussions, and meet-and-greet sessions for students. Recognised for her teaching, she received CQUniversity's Student Voice Award for 2021 and has earned several commendations. She has also been nominated for excellence awards in teaching, research, and service contributions. More details are available on her [university profile page](#).
