

## Thambi M

Thambi M is Director and Founder of Simplfin Technologies, a fintech solutions provider at the intersection of traditional banking infrastructure and emerging AI technologies. With over 17 years of experience transforming core banking systems for major financial institutions across Asia-Pacific, the Middle East, Africa, and Papua New Guinea, Thambi brings a unique perspective on how AI can enhance and transform banking operations.

As an entrepreneur who has guided banks through complex technology transformations, Thambi understands the critical balance between innovation and operational stability. His experience implementing mission-critical systems for leading institutions—from Loans and Trade Finance to Collections and Treasury operations—provides deep insights into where AI can deliver the greatest impact in financial services: from fraud detection and credit risk assessment to process automation and customer service enhancement.

Under his leadership, Simplfin Technologies helps financial institutions navigate the evolving landscape where traditional banking infrastructure meets artificial intelligence. Whether it's exploring how AI can improve eKYC, how AI-powered analytics can optimize loan operations, or how intelligent automation can transform back-office processes, Thambi focuses on practical, implementable solutions that deliver measurable value while maintaining the security and compliance standards essential to banking.
